Introducing The Oddity Crypto Coin

A Coin Backed by Solana's Speed and Efficiency

Our goal is to work with members of our community to develop exciting utilities based around the Oddity Crypto Coin. If you have any ideas, suggestions, or like to volunteer services, please hit us up on our [Telegram Channel](#).

What is Oddity Crypto?

Oddity Crypto is a Coin built on the Solana blockchain, leveraging its unmatched speed, scalability, and low transaction costs. Oddity Crypto offers a seamless experience for users and developers alike.

Why Choose Solana for Oddity Crypto?

Oddity Coin is built on Solana, one of the most advanced blockchain networks, ensuring:

1. **High Throughput**
   Solana handles up to **65,000 transactions per second (TPS)**, making Oddity Crypto transactions lightning-fast.
2. **Low Costs**
   Each transaction costs as little as **$0.00025**, making Oddity Crypto affordable for everyday use.
3. **Scalability**
   Solana's architecture ensures that Oddity Crypto can grow with the increasing demands of users and developers.
4. **Eco-Friendly**
   By utilizing Solana's Proof-of-Stake (PoS) consensus, Oddity Crypto supports sustainable blockchain operations.

What makes us an "Oddity" is our community desire to set ourselves apart from the other crypto projects fueled on hype and broken promises.

Oddity Crypto is public and everyone can take part in ownership of the Coin.

We believe our community driven projects will set us apart and truly make us an "Oddity".

Key Features of Oddity Crypto Coin Running On Solana

1. **Fast and Affordable Transactions**
   Oddity Crypto transactions are near-instant and cost-effective.
2. **Developer-Friendly**
   Solana's developer-friendly tools make it easy to integrate Oddity Crypto into new and existing dApps.

Pump.Fun Contract Basics:

- Our contract was created as a fair-launch contract with no pre-sale or team allocation.
- Solana Is Used to Swap to Oddity
- Coin prices controlled via a bonding curve
- Sell at any time to lock in your profits or losses
- When enough people buy on the bonding curve it reaches a market cap of $100k.

- Once the market cap is reached $17k of liquidity is then deposited into Raydium and burned.
- Place the buy order for your desired amount of meme Coins and wait for the transaction to be confirmed.

Key Points:

- 1 Billion total Coin supply
- Bonding curve
- Fairly Launched
- No pre-sales launched

Crypto is volatile and a substantial risk.

The price of a Oddity Crypto can unpredictably increase or decrease over a short period of time due to its young economy, novel nature, and sometimes illiquid markets. Consequently, keeping your savings with Oddity Crypto is not recommended at this point. Oddity Crypto should be seen like a high risk asset, and you should never store money that you cannot afford to lose with Oddity Crypto
